Kern County	E-39 to E-0	Dominion ImageCast Remote 5.10	11		County needed additional proofing to abide by E-45 deadline. Had sent email to UOCAVA voters through DFM's email system. After proofing, RAVBM instructions were sent to voters. This affected the county's ability to track how many UOCAVA users actually used the RAVBM system, therefore this number may not be accurate.

					2/03/2020 Issue Description: Voter received "No Ballot Found" notification after following link sent to their email. Action Taken: Ballot mapping in the election configuration was updated to include precinct values previously missing in provided data. Explanation: Precinct mapping provided by the county did not include the precinct value the that the voter who reported the issue was assigned to. This issue was resolved after the county provided updated ballot mapping that Democracy Live programmed into the election configuration. 2/04/2020 Issue Description: Voter Received wrong party's ballot due to miscommunication of formatting of the URL's given to voters. Action Taken:OmniBallot site configuration updated to work with links previously provided to voters and new links sent to voter contained fix formatting Explanation: Voters are supplied specifically formatted URLs by email from the county in order to provide the voter access to their ballot on the Omni Ballot site. The issue occurred when a miscommunication between the County and Democracy Live resulted in URLs with incorrect formatting were sent to voters. The voters received Non Partisan Ballots rather than their designated party affiliation due to this issue. Democracy Live updated the site to work with URLs the county had been providing and updated URLs with the correct formatting. 2/20/2020 Issue Description: Voter received "No Ballot Found" notification after following link sent to their email Action Taken: Democracy Live republished the election and site configuration. Explanation: The voter received a correctly formatted URL but still experienced a no ballot found message. The issue was not reproduceable by Democracy Live so the site and election were republished as a precaution to confirm the published site matched the version of the site that Live had tested the reported issue on. No further notice from the county provided about this issue.
